

Protect your data with our Whitewall

minimal dimensions • minimal power consumption • broad variety of services in basic configuration

We all know how fundamental the Internet is when doing business nowadays. We all know, however, the hazards it brings along. Protection from these risks is complicated and costly.

We offer a solution that unifies security and low price: **Whitewall**.

What is it?

On hardware level, Whitewall is a **Micro-ITX PC** (i.e. very small compared to common PCs), and therefore **occupies next to no space**. This also means **very low power consumption and minimal noise**.

Whitewall runs under **Endian** operating system and therefore can be maintained by any experienced administrator – customer is not bound to the supplier when looking for maintenance.

How much does it cost?

Whitewall Annual Service Agreement

The price covers:

- **hardware** (computer)
- **UTP cabling**
- **initial configuration** of selected services
- **installation** at customer's place
- **technical documentation**
- **thorough testing** before starting ordinary operation

799 EUR

The contract covers:

- **updates** (antivirus, kernel, packages, antispam filter)
- **maintenance** (monitoring of utilization, incidents, and availability, regular controls, debugging, backup)
- **services** (phone/email assistance, provision of reserve hardware in case of breakdown, guaranteed recovery time, discounts)

399 EUR

Customers without contractually provided services are offered Whitewall system maintenance for standard tariff 1 000 CZK / hour which applies for any required operation. The Service Agreement can be concluded additionally, the contract being valid for 1 year since the date of its signup.

Basic configuration

- **Firewall + DMZ**
- **Open VPN**
- **Proxy server**
- **HTTP server**
- **FTP server**
- **DNS server**
- **File server**
- **Mail server (SMTP, IMAP, POP3)**
- **Antispam**
- **Antivirus**
- **Services Availability monitoring**
- **Access Restriction for selected web addresses**
- **Users' internet activity log**
- **Reports**

Additional services

- **Intrusion Detection System**
- **Traffic Prioritization (QoS)**
- **Traffic Shaping**
- **Speed Restriction for selected P2P applications**
- **Instant Messaging & VoIP systems**
- **and many more...**

If you ...

- know the risk of Internet connection
- do not trust cheap „boxes“ and firewalls suitable rather for home usage
- understand that to function properly, a firewall needs regular maintenance
- look ahead and want to be prepared for future needs of your company (e.g. VPN, company mail server, etc.) without increasing your costs
- prefer your own solution and independence from suppliers
- wish to feel secure about your data without paying immoderate amounts,

...Whitewall is the right solution for you!
